**Subject:** Do you still work with imidacloprid?  
**Date:** Monday, August 12, 2013 7:04:19 PM

---

Hi Rusty,

My interactions with you are mostly in regards to rodenticides, but I have recently noticed your name in relationship to the insecticide, imidacloprid.

Who can help me find answers to the questions below.

(1) In the November 13, 2008 "EFED Problem Formulation for the Registration Review of imidacloprid" it is stated that the Honeybee acute contact LD50 is 0.0039 micrograms / bee. What would that be in ppm? Our lab grinds up the dead bees and provides us with a ppm, but your unit is per bee.

(2) Does EPA have an acute oral LD50 for imidacloprid and honey bees?

Thank you.
